Subject: RE: EPA 6 - Regional haze & NM

Let me ask my supervisors and get back to you.

Mark

Mark - Would it be possible to see a copy of the letter you sent to Texas? we are evaluating Texas' approach and list of sources. It would be helpful to know what your view of it is with respect to consultation.

Thanks.

Ok great. I was planning to provide more info on the call but could not focus with the dogs barking in the background. Sounds like you are following the WRAP work -and we've had lots of state status updates on that. We finalized and sent a letter to TCEQ on regional haze consultation last Fri as well.

I was on it and heard the updates.

Hi James, Michael,

It did not sound like you were on the EPA 6 planning call today with NMED.

I'd be happy to have a call with you - maybe including Eric Snyder to give you an update specific to regional haze and discuss next steps. Let me know or feel free to send me an invite for later this week or next week sometime. We plan to discuss our 4-factor potential additional control selection with our sources early May and that analysis is still in flux.

Regards,

Mark
